# THE WORLD OVER

LIQUOR STORES OPEN ALL NIGHT

ONTARIO LIBERAL LEADER "OUT"

74 BELOW AT TELEGRAPH CREEK

**VICTORIA**—Liquor control authorities are seriously considering an all-night operation of a vendor's store in Vancouver to combat alleged illegal sale of liquor in the terminal city. Vancouver police have reported extensive sale of illegal liquor after closing hours of government stores. It is believed all-night operation of an authorized store would combat such illegal sales to a large extent.

**TORONTO**—W.E.N. Sinclair, K.C., house leader of the Liberal party in Ontario was voted out of office as leader of the opposition in the Ontario legislature by a vote of 7-3 at a caucus of Liberal members on Saturday last.

"I've been thrown out, that's all," said Mr. Sinclair.  
Dr. George McQuibbin, member for Wellington North, is to be the new house leader. He had been Liberal leader.  
"I have no comment to make," said Mr. Sinclair after the caucus. "I have been a Liberal since 1896, but apparently they want something hyphenated."

**VICTORIA**—We may have had a cold snap, but what about the residents of Telegraph Creek and other outposts in the Athin district, British Columbia's northernmost constituency, who have just come through the coldest weather in the history of the oldest inhabitants. With Provincial Police reporting many thermometers registering 74 degrees below zero, the lowest point on the instruments, old timers claim they experienced temperatures from 30 degrees to more than 100 degrees below zero during the past week.

He—Didn't I see you taking a tramp through the woods yesterday?  
She—A tramp? That was my father.

CARBON, ALBERTA, THURSDAY, JANUARY 11, 1934

## C'BON CURLING CLUB BONSPIEL JAN'Y 16-17-18

The annual bonspiel of the Carbon Curling Club will be held here next Tuesday, Wednesday and Thursday, January 16, 17 and 18, weather permitting.

Carbon's annual bonspiel usually attracts visitors from all the neighboring curling clubs, and it is expected that this year will be no exception. Last year over twenty rinks were entered in the Carbon bonspiel and the club expects an equal number this year providing the roads are open for the visitors.

### Snicklefritz

"Are you married?"  
"No. Just naturally discontented."  
"You said you filed petitions under the Income Tax?"  
"Yes, but I didn't mention my storm-proof leather overcoat."  
"Duty Jim—if you had \$20,000 what would you do?"  
"Tired Hank—same as now, but in a fur coat and an automobile."  
"You pushed your wife out of a second story window through forgetfulness?" asked the magistrate.  
"Yes, sir; we used to live on the ground floor and I forgot 'what moved'."

When Mose was told that poor Rastus had been shot dead by Judge Hicks while he was stealing the judge's chickens he merely replied: "Oh, well, it might have been worse."  
"How could it have been worse?" indignantly asked the informant. Poor Rastus is dead. The judge said casually: "How de heard right off of him. What could de word din dat?"  
"It might have been worse," repeated Mose. "If de judge live off de gun de night before he might have how de head off me."

### WHAT ABOUT IT, CANADA?

The following is the first of a series of Articles on The Douglas Plan, which will be published weekly in this newspaper.

An exposition of the Douglas Social Credit Plan in the form of a dialogue.

The Characters Are:

—W. Mr. Williams, a Social Credit enthusiast.

—J. Mr. Jones, his friend, who knows nothing of the subject.

**I**  
**Scene:** Street corner in a city in Western Canada.

W. "Hello, Jones! You're quite a stranger! Have you been keeping? So, you're not coming on well?"  
J. "No, Williams, I don't feel very bright these days. I'm pretty worried about my business. Things are not going very well and I can't see much hope in the immediate future."  
W. "Oh, well, let's forget it for the present. How are you? You're looking pretty good. Haven't your business been affected by the depression?"  
J. W. "Affected? Oh, yes; we are just making enough to pay expenses and buy a few meals. There is nothing in the business prospect sheet which is very cheerful. But I've got a new interest!"

J. "What do you mean, a hobby?"  
W. "No, I mean a hobby, something that will give me a little of the pleasure of the depression and I—"  
J. "Oh, economics. Good night, you wouldn't see me smiling if I were studying that. It always gives me a headache."

W. "Sure I know the kind you mean. Dull books and articles with mixed looking charts and full of terms like 'index figures,' 'velocity of circulation' and so on. When you get through with them you are no wiser than you were before. I used to study them once but now I follow the New Economic school, and now I can understand things better."

J. "I'm not much interested in that stuff. I lost those whose business it is to look after it."  
W. "Jones, that's just where you make the biggest mistake of your life. You grow up in a system that you don't understand. You have a vote here. It does you no good as you do not understand the policy of political parties. As a result of your lack of interest you suffer depression and it is all your own fault. If you and those whom you are no wiser than you were before, I used to study them once but now I follow the New Economic school, and now I can understand things better."

J. "I'm not much interested in that stuff. I lost those whose business it is to look after it."

## "LOVEY MARY," A RECITAL BY M. CHALMERS

"There is in the worst of fortunes the best of chances for a happy change."

This is but one of the many homely bits of philosophy in which "Lovely Mary" by Alice Hegan Bliss, and Miss Margaret Chalmers will give this attractive story in print, in the Farmers' Exchange hall, Carbon on Saturday evening, January 13th, at 8 o'clock, under the auspices of the Carbon C.O.I.T.

Mr. Wings of the Calhoun Patch, and other familiar characters will be featured in this delightful recital, which promises entertainment for the children as well as adults.

Miss Chalmers, is the 15-year-old pupil of Miss Theresa Sigel and has gained much popularity and praise.

**MARGARET CHALMERS**  
15-year-old girl whose recital of "Lovely Mary" is being sponsored by the Carbon C.O.I.T. on Saturday, January 13th.

For her splendid performance, which is itself well an hour and a half program, which is published below:

1. "Lover's Song" (a) "A. Hegan Bliss." (b) "The Douglas Plan." (c) "A. Hegan Bliss." (d) "A. Hegan Bliss." (e) "A. Hegan Bliss." (f) "A. Hegan Bliss." (g) "A. Hegan Bliss." (h) "A. Hegan Bliss." # Flour Mills Of Canada Attain Capacity Far Beyond Needs Of Domestic Market

Canada has 1,265 flour mills with a daily capacity of 112,048 barrels. The flour milling industry in Canada goes back to 1865 when the French-settled Port Royal, now Annapolis, N.S. in that year the first wheat raised in America was grown there. And in the same year the first water wheel was erected to provide power for a mill.

Of the milling business today, the current Canadian Pacific Railway agricultural bulletin says: "The four mills of Canada have attained a capacity far beyond the requirements of their domestic markets. The population of the home market, numbering approximately ten and one-half million, requires only about 41,750,000 bushels of wheat."

The quality of the hard spring wheat flour is widely known as the flour manufactured from it is winter wheat grown in Ontario has considerable reputation in British markets. The distribution of the commercially important milling capacity may be shown by provinces as follows:

- "Prince Edward Island, 18 mills with a capacity of 706 barrels per day.
- "Nova Scotia, 16 with 168.
- "New Brunswick 30 with 526.
- "Quebec, 322 with 15,614.
- "Ontario, 670 with 12,124.
- "Manitoba, 38 with 12,090.
- "Saskatchewan, 60 with 13,507.
- "Alberta, 75 with 14,101.
- "British Columbia, 6 with 1,394.
- "Canada has 1,265 mills with a capacity of 112,048 barrels per day.
- The more important milling centres, with capacities in barrels per day, are as follows: Montreal, 21,000; Keewauk, 15,800; Port Colborne, 14,000; Winnipeg, 12,000; London, 8,000; Medicine Hat, 6,000; Peterborough, 5,500; Calgary, 5,000; Saskatoon, 4,200; Moose Jaw, 3,500; Toronto, 3,125; Port William, 3,000; Goderich, 2,500; Portage la Prairie, 1,500; Brandon, 1,200; Midland, 1,200; Vancouver, 1,100; London, 1,000; Brandon, 900; Pactoria, Sask., 850; Chatham, Ont., 800; St. Marys, Ont., 700; Seaford, Ont., 700; Stratford, Ont., 700; Elmhurst, 640; Leithbridge, 600; New Hamburg, Ont., 500; Scurie, Man., 500; Redfear, 400; Woodstock, Ont., 350; Preston, Ont., 325; Tavertock, Ont., 325.
- And one great problem is to find and maintain markets for the flour.

## First Farmers Of Canada

**Indian Method Of Cultivating Land Was Very Primitive**  
Long before the coming of the white man, agricultural people, organized into more or less settled communities, were cultivating the lands of Ontario between the Great Lakes and its continuation along the St. Lawrence Valley, and the Laurentian hills to the west. The Indian tribes, who had learned in the south how to grow maize, beans, squashes and sunflowers, introduced their cultivation into south-eastern Ontario and the St. Lawrence Valley, whence they spread into New Brunswick.

But the Indian methods of cultivation, says Diamond Jenness, in "Indians in Canada," were exceedingly primitive. Their stony earth was tilled into hard maple or birch trees that they depended mainly on burning for the clearing of the land. Long digging sticks or hoed filled with blades of shells supplied the place of ploughs; the digging sticks were gathered by hand and transported in baskets by the women to the husking shed. No tribe understood the rotation of crops, or indeed possessed the means to rotate them, but but few made any attempt to fertilize the soil. Consequently, when their plots became exhausted within ten or twenty years, the community moved away to new but unbroken ground. The exhaustion of the soil supply in the near vicinity was also a common cause for abandonment of otherwise favorable sites.

**At Least Settled**  
An intention to show-paying customers was thus given by a country trader.  
"All persons indebted to our shop are requested to call and settle. All those indebted to our shop and not known to be requested to call and settle. Those knowing themselves indebted and not wishing to call are requested to stay in place long enough for us to catch them."

## Insects Take Big Toll

**Damage To Plants And Trees Runs Into Millions**  
The annual loss caused in the United States by insects is estimated by the Department of Agriculture to reach a total of \$2,000,000,000. Without insecticides, according to Dr. Henry G. Knight, chief of the Bureau of Chemistry and Soils, it would be impossible to feed the world as society is organized today. Only by concerted war on predatory insects which dispute possession of the earth with man can society be protected against famine and pestilence. The damage to growing plants caused by insects every year in this country is estimated to average 10 per cent. of their value. Dr. Knight places the loss to forest trees alone at \$100,000,000 annually.—Washington Post.

Winnipeg Newspaper Union

By Ruth Rogers  
Does a lady on a day's back come legally to a stall in a theatre?  
This was the problem confronting the commissioners of customs and excise when they used an amusement company for entertainment tax on an attraction called "Fun On The Farm."

It was explained the fun consisted in donkey rides along a path built over miniature waterfalls and ponds and other rural delights, and the commissioners agreed a seat in one of these conveyances in the sense of entertainment was equivalent to a seat in a theatre.

The case was decided against the commissioners of customs and excise.

## Many Are To Blame

**Business Decisions During Last Five Years Virtually Caused Depression**

Dr. Oliver W. M. Sprague, says: "For the existing business situation, virtually every one who made business decisions during the last five years is more or less responsible. The thousands of farmers who sold up large pieces of land and incurred heavy burdens of mortgage debts are in part responsible. Industrialists who over-expanded capacity share in the responsibility, as do investment bankers and even economists who recommended the new era."  
Heavy responsibility rests upon those conducting the Federal Reserve System for failure to effect needed restraint during the two years preceding the collapse in 1929. Commercial bankers throughout the country adopted policies that were in accord with those of their clients. In short, it is not too much to say that we were all miserable sinners, bankers, as a class, no more and no less than the rest of the community."

## Commissioners Lost Case

**Court In India Decided Against Tax On Donkey Rides**  
Does a lady on a day's back come legally to a stall in a theatre?  
This was the problem confronting the commissioners of customs and excise when they used an amusement company for entertainment tax on an attraction called "Fun On The Farm."

It was explained the fun consisted in donkey rides along a path built over miniature waterfalls and ponds and other rural delights, and the commissioners agreed a seat in one of these conveyances in the sense of entertainment was equivalent to a seat in a theatre.  
The case was decided against the commissioners of customs and excise.

## Ship Easy On Coal

**Arcton Type Was Invented By Sir Joseph Isherwood**  
A new type of ship which it is claimed will carry half the amount of coal used by a vessel of the same size and speed built only 10 years ago, has been launched at Sunderland, England.  
The ship, 300 feet long and 7,000 tons dead-weight, bulges heavily in the lower half of the hull and the stern is cut away sharply in stream-line fashion to provide greater power for the propellers. Sir Joseph Isherwood, the inventor, placed orders last January for the construction of three of these arcton ships, confident that, despite the depression in the shipping world, the vessels would be sold before completion.

"I shall miss you while you are on your hunting trip," said the young wife affectionately, "and I shall pray that the hunters you are going with will do the same."

More than 1,000 pieces of different material were used in a quilt just completed by Miss M. Thornton, aged 76, of Chalfont, England.

Street lights, gutter, drains and hydrants for washing the highways are contained in a new design of curb being tested in England.

## Effective At That

**U.S. Paper Has Ideas About Canada's Criminal Law**

Canadians seem to have an old-fashioned notion that law is law and should be enforced. In the United States we are more up-to-date.  
For example, a dope peddler was tried in Montreal recently, and this was his sentence:  
(A) Fourteen years in prison.  
(B) Fines amounting to \$300.  
(C) Ten lashes on his bare back.  
You doubt if that gentlemen would care to sell dope again in Canada, even if he had not been given a single day in prison or a single cent of fine.

The whipping alone would probably convince him that he should seek fresh fields and pastures new.  
We don't know that whipping is the best penalty, or that we should adopt it. But we do know that something of the Canadian attitude toward law enforcement would discourage a lot of criminals here.  
When you can't "see the judge," or when your lawyer can't delay a trial for a year or two and then appeal it for another year or two, or when you run the risk of contact with the "cat of nine tails," you have a powerful incentive to be good.

When you see these ideas are too old-fashioned for this up-to-date country.—Washington, D.C., Times.

## Flies Over Frozen Wastes

**Attains Point 250 Miles South Of Captain Cook's Record**

Rear Admiral Richard E. Byrd drove another great aerial wedge of exploration into the uncharted spaces of the Antarctic continent.  
Having the southernly progress of his flagship along the 150th meridian when the ice pack threatened to block all passage, he ordered the ship into open water, put his great airplane over the side and bored into the south.

Before he turned back, the flight carried him to a latitude of 70 degrees, surpassing by 250 miles the record southward point attained by Captain Cook on his meridian in 1772.

## Summer Home In Rockies

**American Banker Building Luxurious Place Near Yellowhead Pass**

One of the most luxurious mountain retreats on the continent of America is being built in the Canadian Rockies by the Davison family, partner in the banking firm of J. P. Morgan & Company, New York. It is situated near the Yellowhead Pass by which the Canadian National Railway crosses the Rockies into British Columbia. Over \$100,000 has been spent on this summer retreat which will command one of the most magnificent views of mountain and valley to be found in the Dominion.

## Preferred Switzerland

The padre, who had not been feeling well, called in his friend the doctor. The latter vetted him thoroughly and then said, "Well, old chap, your lungs are not in good shape. You'll have to spend six months in Switzerland." "But I can't afford the time, my dear man." "Well, that's up to you. It's either Switzerland or heaven."

The padre thought for a long time and then growled, "Oh, all right I then . . . Switzerland."

## THIS IS EASY—TRY IT SOMETIME

Bob of Carmel, shown above balancing a glass of water on his head, was one of the most interesting exhibits at the National Dog Show in London, England. Apart from experience as a juggler, "Bob" of Carmel is a life saver. He has been awarded the animals "V.C." twice for saving his master's life. On the first occasion Bob pulled the boss from a blazing motor car, and in the second case saved his master from falling over a cliff by holding on to his coat tails.

# Squadron Of British Flyers Will Make Long Flight To Show Flag In Remote Lands

## Classy Folk Songs

**Western College Of Agriculture Has Good Selection**

When Dean E. A. Howes, of the College of Agriculture, University of Alberta, looked around for folk songs, he stepped into a deluge.  
Now the dean has 5,000 of them in his collection. But there is one that the modern girl has completely debunked. It's the harrowing tale of "Young Charlotte," a ballad of a bygone day when petticoats were numerous.

Once thrilled by the story of Charlotte freezing to death on a 20-mile ride in a sleigh with her boy friend, George, to a dance, the dean no longer, or hardly, was interested. The song says they spoke only a couple of times and then George went to help her out of the cutter, he took her hand in his. It was cold and hard as stone." She was dead, and George's evening was spoiled.

Debunking of the song came through modern girls dashing around in only a fraction of the clothes Charlotte wore in weather just as severe without suffering any ill effects.  
There are a score of other songs of similar strain in the collection. One tells of the Lord Lovell's bride disappearing at a Christmas eve party when she was "in" in a game of hide and seek. She hid in a chest and "it closed with a spring and her brisley bloom lay withering away in a lonely tomb." They found her skeleton many years later.

## Adoption Of Idea Unlikely

**U.S. Journalists Would Save Space By Abbreviating English**

A Los Angeles American says through the agency of the American Society of Newspaper Editors a suggestion for the abbreviation of English in its implications. He has discovered that the word "the," being the most used in the English language, puts an enormous burden on the press which is hard to bear. A savant in an Iowa university found after exhaustive study that it appeared over 290,000 times in 5,000 words of newspaper print. Now if instead of "the" newspapers used only the symbol "U"—lower case—no per cent of the space and more than 500 per cent of the typesetting required for the full word would be saved. Moreover, if the whole paper were considered, 1 per cent of the white paper bill would be saved by the use of the symbol, while space in editorial matter would find place in the normal-sized paper.—St. Thomas Times-Journal.

## Increased The Sales

**London Retailers Banned Newspaper From Street-Sellers' Profits**

This is an example of what a ban can do for a publication lucky enough to be banned.  
Lady Houston recently printed a scathing attack on the prime minister in the "Saturday Review," which she owns. The London wholesalers from which distribute publications to the retail agents were forbidden to handle that issue of the "Saturday Review."

Lady Houston at once turned the matter over to street sellers.  
The result has been, the editor of the "Saturday Review" told a London newspaper, that during the week 10,000 copies were sold compared with a net sale of 2,000 two weeks previously.  
One day, alone, a week after publication, 1,001 copies were sold by street sellers.

## Had Special Meaning

The custom of hanging evergreens in the house during the Yuletide originally had a purpose beyond that of decoration. In older days each kind of evergreen was believed to confer special blessings on those who passed beneath its boughs. To pass under holly meant good fortune throughout the year, say meant victory, while laurel was supposed to impart a spirit of beauty and poetry.—Missouri Farmer.

"Do you know that I have taken up photography as a career?"  
"Did anything?"  
"Yes, my watch, my saxophone and overcoat."

A new taste for trap is to be widely used in the British Congo.

Next year, for the first time, the annual Royal Air Force formation cruise from Cairo to South and East Africa will be entrusted to a "mixed" squadron. It is a single-engine Fairey day bombers and four Victoria troop-bombers are scheduled to leave Heliopolis aerodrome near Cairo, about Feb. 29 and return there May 1 after a flight of some 12,000 miles.  
Their provisional itinerary goes as far south as Pretoria, and takes them back to Cairo by way of Bulawayo, Livingstonia, Salisbury, Abertown, Mombasa, Nairobi, Malindi (Sultan), and Khartoum.

On the homeward bulk which will carry the bulk of the time, the detachment will be divided into three or four days at each of the chief centres. Flights of two or three machines will be dispatched during these periods to "show the flag" in outlying regions of Rhodesia and Nyasaland and to visit isolated military posts on the northern frontier of Kenya. The opportunity will probably be seized to engage in liaison exercises with the Royal Air Force in the North African Air Force.

Fairey 2B biplanes have been employed for the past five or six years. These numbers with the Royal Air Force. They are "general purpose" planes, made-of-all-work of the service which in the course of performance they are required to perform any and every kind of task. This type of aeroplane has been developed in Great Britain to a higher pitch than in any other country, a supply because the responsibilities of the Royal Air Force, which is charged nowadays with the policing of approximately 1,000,000 square miles of the world's surface, demands such machines.

Amphibious work, aerial survey, gunnery spotting, day bombing, offensive and defensive fighting—these are but a few of the varied duties of the British "general purpose" aeroplane. Adaptability and absolute trustworthiness are essential in the 2B craft, each of which is powered with a Napier "Lion" 520 h.p. motor, these qualities combined make it a machine with speed and general flying efficiency.

The "Victoria" biplane has been the standard troop-carrier of the Royal Air Force for several years. Recently it has been re-designed. The result is notably increase of performance and the revival of a type of aircraft which three years ago was thought to be obsolete. The new "Victoria," like its predecessor, has accommodations for 22 fully equipped infantrymen in the cabin, but it can carry a much larger load than the older machine, has a longer practical cruising range, and is faster and climbs more rapidly to a higher "ceiling."

A considerable number of the new model was ordered recently by the Air Ministry in the normal course of replacement of older machines. Two of the new machines reached Egypt at the beginning of this month. Five more recently arrived at Dardanelles.

## Exhibit Was Interesting

**Tricycle Used By King Edward Seventh Was On Display**

Among the interesting exhibits at the bicycle and motorcycle show at Olympia was a tricycle which King Edward VII. rode on the advice of his doctor.  
It was in 1896 that they recommended him to take up tricycling for his health. Although his legs were not in the best of health, the price soon became apparent. He ordered three machines, one for Sandringham, another for Balmoral, and a third for Sandringham House, which he later took to Buckingham Palace.

## Purely Domestic

The Christian Monitor says if the plan is carried to its logical conclusion, the United States Army, which has eliminated from its menu of bananas, cane sugar, and other articles of food, solely because they are produced in countries which have military activities to home sources.

Host eating in cafe—"Why don't you tell the manager if the steak is like leather?"  
Visiting Friend—"He might want to charge us some prices then."

What a paradise for editorial writers and columnists must be Mackay, N.Y., where the local press is a collection of newspaper men in the old-fashioned style.

### CHRIST CHURCH, CARBON

Services will be held as follows:

1st Sunday in month—Morning Prayer and Holy Communion.

2nd Sunday—Morning Prayer.

3rd and 4th Sundays—Evening service.

5th Sunday—No arrangement.

SUNDAY SCHOOL, Every Sunday morning at 11 o'clock.

REV. J. R. DAVIES

The weather the past week has been mild and warm, with bright sunny days. A change, however, seems to be in the offing.

On account of the warm spell the hockey game at Trochu on Tuesday night was postponed.

**LOST**—Large horse blanket between Carbon and filling station. Reward. Return to Carbon Chronicle office.

Mr. and Mrs. W. Poxon were Calgary visitors on Tuesday of this week.

Entries for the Carbon hospital close on Monday night. Any local or outside clubs wishing to enter should do so at the earliest possible date.

Miss Margaret Chalmers, who will give a recital in the Farmers Exchange hall on Saturday night under the auspices of the Carbon C.O.T.U. is the pupil of Miss Thelma Stuart, well-known Calgary teacher. Miss Chalmers is only 13 years of age, and so pronounced is the quality of her recital that many prominent Calgary people have personally complimented her. Don't fail to hear Miss Chalmers on Saturday night of this week.

Stinson: How much are you asking for your rent now?  
Timson: About twice a day.

"Father" said little Frank as he turned the pages of his history book: "How did the cliff dwellers live in the winter time?"

"Why, I guess they used the mountain ranges. Now don't ask any more foolish questions."

"Well son how do you like the law?" the father asked.

"Aw, it ain't what it's cracked up to be," said the boy. "I'm sorry I ever learned it."

A Christmas and New Year's cruise to the Caribbean and around the world cruise later by the same ship, the Empress of Britain, a Mediterranean cruise by the Empress of Australia; two Duchess of Bedford cruises to the West Indies and twenty trans-Atlantic sailings from Canadian ports are scheduled for Canadian Pacific liners for this winter season.

The second reunion of all pilots and observers who had commissions and wings before November 11, 1918, will be held at the Royal York Hotel, Toronto, on January 12, 1934. The reunion was held April, 1932, when 225 wartime flyers from a number of countries attended. The reunion is expected to be one of the most brilliant functions of the year, and will be held at the Canadian Pacific hotel.

Wide-spread interest in John Murray Gibson's book, "The Magic of Melody," is again illustrated by the gramophone conducted by the "Gramophone" and "Everyman," London publications. Empire-wide response to this contest resulted in an Overseas prize being awarded to Miss Gladys Kivens of Toronto, for a poem, written to the music of the Sonata Pathétique.

### HERE IS A SPLENDID CHANCE TO SAVE ON READING MATERIAL

Through a Special Combined Offer you can now subscribe to The Carbon Chronicle and the Family Herald and Weekly Star, both for a full year for just \$2.00. This offer will be good for a short time only and is open to both new and renewal subscriptions to The Chronicle.

Brighten your home through the weekly visit of these two outstanding papers at a cost which has been cut on as low as to be within the reach of all.

The Carbon Chronicle is indispensable to you. Only through it can you keep in intimate touch with all the news interest in Carbon and vicinity. It offers you complete local news as well as a digest of Dominion and world wide events of importance. As your local paper, you need it.

The Family Herald and Weekly Star is a family paper for the whole family. It is the accepted choice of over 200,000 Canadian homes, rich in helpful and instructive reading, combining a splendidly edited farm journal, a wide-spread weekly newspaper and a magazine section replete with fine serial and short stories.

Call at The Chronicle Office today. Pay up your subscription or become a new subscriber and you will receive the Family Herald and Weekly Star and this newspaper, the two together for only \$2.00.
